## Understanding Your LED Display

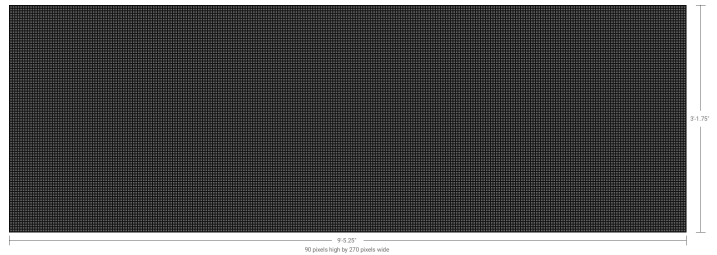

### Pixel Pitch

10.66mm (0.42 in.) is the pixel pitch. This is the distance between the centers of individual pixels (points of light) in the LED display. The smaller the pitch, the more pixels can fit inside of the display.

### Matrix Size

90x270 is the matrix size. This is the number of pixels high (90) and the number of pixels wide (270) of the display. That's **24,300 pixels per side!** The more pixels, the higher the clarity and amount of detail that can be shown.
